#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 02 March 2007.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with/without traverse of species A and D in the reply filed on March 2, 2007 is acknowledged. The traversal is on the ground(s) that species A-D are all encompassed by at least Figures 4, 5A, and 5B. This is not found persuasive because the issue is whether or not the species are distinct. These species are not disclosed as being usable together and are therefore mutually exclusive.

The requirement is still deemed proper and is therefore made FINAL.

Claims 6 to 8 and 11 to 27 therefore stand withdrawn from further consideration as being drawn to non-elected species.

### ***Claim Objections***

Claim 1 is objected to because of the following informalities: in line 3, "an recess" should read --a recess--. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 to 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Hung (US 4,789,310). Hung discloses a portable air compressor having a plastic shroud (col.4, para. 3). The shroud has storage recesses 311 which have covers 312. The shroud also has a handle 319.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hung in view of Westphal et al (US 6,120,077). Hung discloses the invention substantially as claimed. However, Hung does not disclose a cover member made of fabric. Westphal et al disclose a storage compartment cover member which is formed of fabric (netting). Netting is more lightweight and economical to manufacture as compared to the solid plastic cover 312 of Hung. In view of this teaching, it would have been obvious to substitute netting for the plastic cover of Hung.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hung in view of Westphal et al, as applied to claim 4 above, and further in view of Moore (US 6,099,222). Moore discloses netting which is made of Nylon (col. 12, para. 3). Nylon is known for its tensile strength and durability. In view of this teaching, it would have been obvious to use Nylon as the netting material of Hung, as previously modified.

***Allowable Subject Matter***

Claims 9, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

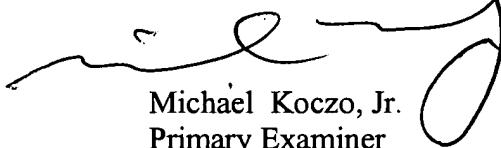

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
